Oekraïne is grote producent van groenten maar weinig internationale handel

10 miljoen ton groenten; wereldwijd de nummer 16

Oekraïne is een behoorlijk grote producent van groenten. Jaarlijks wordt er een kleine 10 miljoen ton groenten geproduceerd. Daarmee is Oekraïne wereldwijd de nummer 16. De productie van fruit bedraagt jaarlijks rond de 2,7 miljoen ton waarmee Oekraïne wereldwijd de nummer 53 is.

Over een langere periode gezien neemt de productie van fruit af terwijl die van groenten redelijk stabiel blijft.

Belangrijke producten die in Oekraïne geteeld worden zijn: tomaten, kool, pompoenen, appelsen, uien, komkommers/augurken en peen.

Een miljoen ton verse fruit ingevoerd; vooral citrus en zuidvruchten

Qua internationale handel in verse groenten en fruit is Oekraïne vooral een importland. Nadat de import rond de inval in de Krim in 2014 wat afnam is deze de laatste jaren weer gegroeid naar een kleine 1 miljoen ton. De import van verse groenten is de laatste jaren duidelijk groter geweest dan daarvoor maar is ca. 200.000 ton van bescheiden omvang.

De export van verse groenten en fruit uit Oekraïne is van bescheiden omvang met in 2020 rond de 60.000 ton vers fruit en 70.000 ton verse groenten.

Veel verwerkte groenten en fruit uitgevoerd

Oekraïne is een heel bescheiden exportland van verse groenten en fruit. Er wordt meer verwerkt product uitgevoerd. De belangrijkste productgroepen hierbij zijn: gedroogde groenten vooral erwten (exportwaarde 110 miljoen euro), bevroren fruit (exportwaarde 100 miljoen euro), gepelde walnoten (85 miljoen euro), vruchtensappen vooral appelsap (65 miljoen euro) en verwerkte tomaten (65 miljoen euro)
